**Subject:** Upper Animas DMG Reports - Dropbox

Jon - This is a link to a "dropbox" from the Colorado Department of Reclamation, Mining and Safety (DRMS) that contains the reclamation feasibility studies that were generated as part of (or subsequent to) the UAA sampling in the mid 1990's. Its broken out by Mineral Creek, Cement Creek, Animas River above Eureka and Animas River below Eureka. In these reports ARSG with DRMS' assistance prioritized the sites from the UAA that they wanted to address - i.e., they were big metal loaders to the SW system.

I haven't used "dropbox" very much so I hope sending you a link will work. Otherwise, we have alternate means of sending these docs to you. I'm also sending a copy of the UAA in another email.
